

Programs of Excellence Expressions of Interest For Internal Students

Goals: ALP is an advanced learning pathways program designed to engage students in higher-order, creative and lateral thinking skills and processes, problem solving and decision making.

This program places like-minded students in a challenging and rigorous environment, designed to celebrate academic excellence and enable each student to reach their full academic potential.

Students will be extended with complex challenges and appropriate degrees of independence through their personal Advanced Learning Plan.

Goals: The Sporting Minds High Performance Sports Program will nurture and develop the physical, mental, social and emotional potential of high-performing student athletes.

This program will recognise emerging elite athletes and assist them in achieving excellence in both sport and academics. With the right attitude, motivation, and support, almost anything is possible and this program will maximise elite athletes' potential.

This program, with its focus on athletic development including strength and conditioning, nutrition and sports psychology, will provide unique opportunities for all participating students, regardless of their chosen sport/s.

Goals: Creative Voices will extend and accelerate students in music, drama, and/or public speaking.

Creative Voices will provide a platform for students to broaden their skills by working collaboratively with other students, industry artists/speakers, teachers and guest professionals.

The program will inspire, provide student mentoring and prepare students for a career in the arts, public speaking or in community advocacy or engagement.

Goals: G-STEM will engage female students in advanced STEM education and promote women in STEM careers.

Real-life female role models will mentor and support our passionate female STEM students. Students will have opportunities to engage in programs, challenges and competitions at a state, national and international level and engage with like-minded students across the world.

We are proud to be partnering with Wonder of Science, University of Queensland.

Please refer to Eligibility Criteria for all Programs of Excellence on Page 2 of this document.
